

PROFESSIONAL PRACTICE ANALYSIS

Group work

For the sake of efficiency, our brain and our functioning mechanisms lead us to behave in a fairly similar way depending on the situation. It is useful to be able to step back and look at the choices we make and what we are implementing. This **systemic approach** makes it possible to bring out other issues, which are very present but less visible, and which lead to the **consideration of new modes of action or new ideas**.

Who is this for?

In-company: a team, a project, a group of peers...

Inter-company: members of a Club, a peer group...

Some examples of **context**:

Organisational change, team development, positioning in a project / team / organisation, implementation of efficiency measures...

Your needs:

- Review your professional practices or actions,
- Clarify the stakes of an ongoing project or action,
- Find new solutions in what you implement.

Our offer:

PROFESSIONAL PRACTICE ANALYSIS GROUP WORKSHOP

For a specific need, for a team, a project or a group of peers, the practice analysis workshop will allow you to review your practices by changing your perspective, thanks to a **systemic** approach. As a result, you will be able to consider **innovative and creative solutions** to meet your challenges.

PROFESSIONAL PRACTICE ANALYSIS GROUP PATH

The course corresponds to a series of **8 practice analysis workshops**, at the rate of **one half-day or one day per month** depending on the number of participants.

Compared to a one-off workshop, the Path makes it possible to have a more lasting impact on the way one looks at one's activity, by **anchoring systemic reflexes** and experimenting with **collaborative approaches** (co-development, systemic constellations,...) in order to be able to **identify concrete courses of action**.

To go further:

- Coaching of organisations
- Team / project coaching
